AVAYA

IP Office
4620/5620 Phone User Guide

Table of Contents

The Telephone

Overview

This guide covers the use of the Avaya 5620 and 4620 telephone on Avaya IP Office telephone system. These two phones are physically similar, the key difference being that the 5620 is only supported on the IP Office where as the 4620 is supported on a range of Avaya phone systems.

The diagram below shows the main telephone features.

1. **Display and Feature buttons:**
   The Call Appearance Keys allow the user to handle multiple calls with the display showing call information, e.g. the name/phone number, etc. There are four pages in the display; giving up to 24 system features that can be allocated to the function keys. See Call Appearance Keys and Overview of the Function Keys. The information displayed varies according to the active feature.

2. **Message waiting lamp:** Used as follows;

   - **On (Continuous):** There are new messages in your voicemail mailbox, or in another mailbox for which you have been configured to receive "Message Waiting Indication".

   - **Flashing:** The lamp can also be set to flash when the phone receives a call. See Visual Alerting.

3. ◄ ►**Page Right/Left:**
   Shifts from one page to another in the same application when the display presents the paging indicator (↔). These buttons have no effect when the paging indicator is not displayed.

4. **Options:**
   Displays the Options main screen, from which display and application settings can be updated

5. **Call Handling Buttons:**

   - ⊻ **Hold:** Red button used to place a call on hold.

   - ❲➔❲ **Transfer:** Transfers a call to another phone.

   - ❲❲❲ **Conference:** Sets up conference calls with more than one other person.

   - ❲↓ **Drop:** Drops the current call or, if on a conference call, drops the last person to join the conference.

   - ⊞↩ **Redial:** Redials the last number dialed or displays the last 6 numbers dialed from the phone, depending on configuration via the Options menu.

6. **Numeric (Dialing) Pad:**
   Standard 12 button pad for dialing phone numbers.

7. ▼▲**Volume Controls:**
   Adjusts the handset, speaker, headset, or ringer volume, depending on which item is in use. As you increase or decrease the volume, the top display area provides either a speaker, headset, handset, or ringer icon to indicate for which item you are adjusting volume, followed by a visual "volume meter" showing the volume level. These buttons also control the volume of the key click sounds made when you press fixed buttons on the phone, such as the dial pad or softkeys.

8. ✗ **Mute and LED Indicator:**
   Turns off the active Speaker, handset, or headset microphone to prevent the other person from hearing you. The associated LED lights steadily when the handset or headset is muted.

9. 🎧 **Headset and LED Indicator:**
   With a headset connected, changes audio control from the handset or speaker to the headset. The associated LED lights steadily when the headset is active. The headset jack socket is located on the base of the telephone underneath the front edge.

10. ◁ **Speaker and LED Indicator:**
    Accesses the Speaker feature. The associated LED lights steadily when the Speaker is active.

11. ☎ **Phone/Exit:**
    Displays the phone application main screen or, if applicable, exits the current IP Office based feature, such as Speed Dial or Call Log, and normalizes the display

12. ⬭ **Softkeys:**
    Used to navigate to or initiate certain features, such as Speed Dial or Call Log, as well as control certain actions within the features. These keys correspond to the text prompts in the display screen immediately above them.

Call Appearance Keys

There are four pages of Call Appearance and Function Keys. You can step through these with the
➤◀keys. At default, first page of the main call screen contains three keys set as 'call appearance' keys.
With these keys the phone is a multi-line phone and are indicated as **a=**, **b=** and **c=**. The remaining 21
Function Keys can have system features allocated to them, by your System Administrator, that are
specific to your requirements (see Function Keys).

Your System Administrator can change a call appearance key with:

- **A Bridged Appearance**
  A bridged appearance key matches the status and operation of the Call Appearance Key on a
  pre-defined colleague's telephone. Hence, you can pick-up, make and receive calls on behalf of
  your colleague.

- **A Line Appearance**
  An IP Office exchange line (but not IP lines) can be allocated to you such that the status of that
  line is displayed and you can use the line appearance key to make and receive calls.

- **Call Coverage Appearance**
  A call coverage appearance key alerts you when a pre-defined colleague is receiving a call. The
  covered user does not need to be using call appearance keys. Hence, you can pick-up calls on
  behalf of your colleague.· A System Feature

- **System Features:**
  System Features, such as Abbreviated Dial (that automatically dials a frequently used number)
  can be set against key and/or dial pad digits.
  See Function Keys.

All of the above can only be allocated to you by your System Administrator.

For details of Bridged, Line and Call Coverage Appearance Keys set-up and their operation, refer the *IP
Office Key and Lamp Operation* manual.

CAUTIONS:

1. Having more than two Call Appearance keys is very useful. When holding a call you can
   answer/make another call and then switch between calls or transfer or conference. If you are set
   to receive call waiting indication, the waiting call is shown against the next call appearance key.

2. Although the System Administrator can replace the Call Appearance Keys with:

   - A Bridged Appearance

   - A Line Appearance

   - Call Coverage Appearance

   - System Features

   This would severely restrict the use of features such as conference and transfer.

> It is for these reasons that it is **strongly recommended** that all Call Appearance keys **remain at their
> default settings.**

Call Appearance Keys Icons

The icons displayed against the Call Appearance/Feature Keys allow you to determine the status (for example, on Hold) of each call. Icons also indicate whether a feature has been activated for a particular button.

- **Incoming Call:** ♨
  A ♨ symbol next to a call appearance key indicates an incoming call. Pressing the adjacent ⬜▷ ♨ key answers the call and puts any other current call on hold.

- **Connected:** ⌇
  A ⌇ symbol next to a call appearance key indicates that it is the currently connected call. The caller's telephone number (if available) is also shown. Pressing the adjacent ⬜▷ ⌇ key puts the call on hold. An **H** is also shown on the display.

- **On Hold:** ⌣
  A ⌣ symbol next to a call appearance key indicate a call on hold. Pressing the adjacent ⬜▷ ⌣ key takes the call off hold and puts any other current call on hold.

- **Function Active:** ◀▶
  The button to the left or right of the function key is active.

System Features

System Features **can only be** set against soft Function Keys by your System Administrator. However, your System Administrator may allocate you two 'self administrator' features that will enable you to add System Features to your soft Function Keys. Refer to Overview of the Function Keys for details of the System Feature that **can only be allocated to you** by your System Administrator.

In addition, there are a number of System Features that you can always access yourself by the use of short codes. Refer to System Features Introduction for details of System Features that you can always access yourself by dialing short codes, e.g. ***17** to listen to your voicemail messages.

Basic Call Handling

Answer Incoming Calls

When there is an incoming call, you will hear a ringing tone and a blinking bell icon appears on the associated call appearance screen.

To answer an incoming call, do one of the following:

Answering the first incoming call

1. Pick up the handset or press the ◁ button to use the speakerphone.

Answering waiting calls

1. If you have call waiting switched on, the waiting call is shown against the next call appearance key and a tone is played to further indicate the waiting call. If you choose to answer the waiting call, press the ▭ button corresponding to waiting call and the current call will be placed on hold.

Make a Call

There are several options for making a phone call, depending on what how you want to use the phone.

Making a call using the handset

1. Pick up the handset.

2. Dial the phone number of the person you want to contact, including any outside line digits and/or area codes.

Making a call using speakerphone

1. Press ◁.

2. Dial the phone number of the person you want to contact, including any outside line digits and/or area codes.

3. See Speakerphone for more information on using the speakerphone.

Making a call using speed dial

1. See Using Speed Dials.

Clearing a Call

To clear an established call either:

1. Replace the handset

or

2. Press ↲ **Drop**. You will hear dial tone, unless you are in 'call center mode' of working when you will then hear silence.

Headset Working

When a headset is to be used, it must be plugged in to the headset socket on the base of the phone. To activate the headset and switch off the handset, press 🎧 **Headset.** The lamp beside the button is illuminated when headset working is activated.

To answer an incoming call:

1. Press the call appearance key 🔲 next to the flashing bell icon (🔔):

To clear a headset call:

1. Press ↳ **Drop**.

To manually make a call:

1. Dial the number (remember to include the required access code (for example, 9) for an outside line) and listen to the progress of the call.

To automatically make a call:

Do any of the following:

- Press ⊞↩ Redial and a call appearance key 🔲 to have the telephone dial the last number that you dialed. See Redial.

or

- Access the Call Log and initiate a call to a specific entry. See Making Calls from the Call Log.

or

- Access the Speed Dial List in your personal directory and initiate a call to a specific entry. See Dialing a Speed Dial Number.
- When the call is answered, speak to the called party.

Speakerphone

The two-way built-in speakerphone allows you to make and answer calls without lifting the handset. Keep in mind that two-way speakerphones may not operate satisfactorily in every environment (such as in very noisy locations).

Using the speakerphone with any feature:

1. Press ◁).

2. Make or answer the call, or access the selected feature.

3. Adjust the speakerphone volume if necessary.

4. To change the volume, use the ▲ and ▼ buttons. The display bar at the top of the display screen shows the volume level. (There are eight volume levels.)

Changing from speakerphone to handset:

1. Pick up the handset and continue talking.

Changing from handset to speakerphone:

1. Press ◁).

2. Hang up the handset.

Ending a speakerphone call:

1. Press ◁) again.

Mute

During an active call, the Mute feature prevents the party with whom you are speaking from hearing you. This feature is most commonly used in conjunction with the Speakerphone, but can be used to hold an off-line conversation at any time during a call.

Preventing the other person on the line from hearing you

1. Press ✦ **Mute**.

2. The other party cannot hear you. The indicator next to the Mute button lights when Mute is active.

3. To reinstate two-way conversation, press ✦ **Mute** again.

Hold

The Hold feature puts a call on hold until you retrieve it.

Placing a call on hold

1. Press the ☟ **Hold**.

2. The line display area changes to white text with a dark gray background, and the ☟ hold icon displays.

Retrieving the held call

1. Press the corresponding ▭ Line/Feature button on which the call is being held, or press the ☟ **Hold**.

2. The call is now active.

Speed Dial

The Speed Dial feature allows the phone to dial numbers stored in your personal directory (maximum of 104).

To make a call to a personal directory entry using the Speed Dial feature

1. From the Home screen, press the ⬭ **SpDial** softkey. The **Speed Dial** screen is displayed.

2. Press the button next to the entry you want to call.

3. If the entry you want is not displayed, use ◀ and ▶ to cycle through the entries **or** key the first letter of the required name to jump to the page with a matching entry.

4. The telephone dials the number for you.

Redial

The Redial feature automatically redials a previously dialed extension or outside number (up to 24 digits). The phone can store the up to six of the last numbers dialed.

To redial previously dialed number:

1. Press ▦ **Redial**. Use ◀ and ▶ to step through the entries. When you have located the required number, press the associated key.

To change the Redial number selection:

1. Press ✓ **Option** and select ▭ **Application Options.**

2. Select ▭ **Redial**. It will toggle between **Last 6 Numbers** and **Last Number**.

3. Select ⬭ **Save**. To restore the previous setting without changing it, press ⬭ **Cancel**.

Transfer

The Transfer feature lets you transfer a call from your telephone to another extension or outside number.

Transferring a call to another telephone

1. With the call active (or with only one held call and no active calls), press the ⟨→⟨**Transfer**.

2. The call is placed on hold; the ⏗ **Hold** icon displays and you hear a

3. dial tone while the next available line activates.

4. Dial the number to which you want to transfer the call.

5. If you do not want to announce the call, press the ⟨→⟨**Transfer** again and proceed to Step 6. If you wish to wait for an answer and announce the call, go to Step 7.

6. The call is sent to the extension or number you dialed. A two-second display message indicates the transfer is complete.

7. Remain on the line and announce the call; if the line is busy or if no one answers, return to the held call by pressing the Call Appearance/Feature button on which it is being held.

8. Press ⟨→⟨**Transfer** again.

9. The call is sent to the extension or number you dialed. A two-second display message indicates the transfer is complete.

10. Hang up your handset.

Conference

The number of conferences available is dependent on the IP Office unit set up on your system.

Adding another party to a call

1. Dial the first party, then press ⟨⟨⟨ **Conference**.

2. The line display area changes to white text with a dark gray background. The current call is placed on hold, the ⏗ Soft Hold icon displays and you hear a dial tone.

3. Dial the number of the next party and wait for an answer.

4. Press ⟨⟨⟨ **Conference** again to add the new party to the call.

5. Repeat Steps 1- 3 for each party you want to conference in to the call.

Adding a held call to the current call

1. Press ⟨⟨⟨ Conference.

2. The icon on the current line changes to the ⏗ Soft Hold icon.

3. Press the ▭ Call Appearance/Feature button corresponding to the held call.

4. Press the ⟨⟨⟨ Conference button again.

5. All parties are now connected.

Dropping yourself from the conference

1. Press the ⟨↓ **Drop** button.

2. Disconnects the line on which the drop button is pressed.

Speed Dials

Overview of Speed Dials

The phone can store up to 108 personal speed dials, accessed by selecting ⬯ **SpDial** on the display.

```
┌────────────────────────────┐
│ Extn290 290                │
├────────────────────────────┤
│ Acme              Joe      │
│ Bob               John     │
│ Frank             Kate     │
│ INDeX             Mark     │
│ Jack              Recept   │
│ Janet             Simon    │
│      Add   Edit  Delete    │
└────────────────────────────┘
```
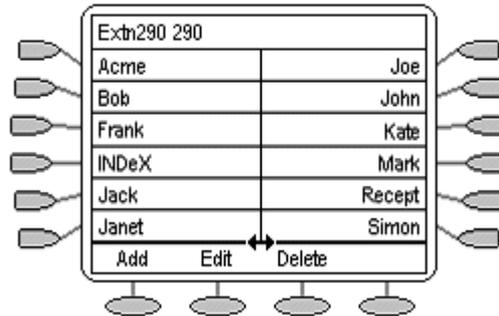

- The speed dials are sorted alphabetically.

- Pressing the ⬭ or ⬮ key adjacent to an name, dials the speed dial number stored with that name.

- The ↔ symbol indicates that there are more pages. You can more between pages using the ◄ **Page Left** and ► **Page Right** keys.

Pressing ⬯ **Add** allows you to add a new speed dial. You can also press ⬯ **Edit** and an existing speed dial to edit its current settings.

```
┌────────────────────────────┐
│ Extn290 290                │
├────────────────────────────┤
│ Name: Jack                 │
│ Number: 4526               │
│ Delete          Apostrophe │
│                    Hyphen  │

│  Save   ←    →   Cancel    │
└────────────────────────────┘
```
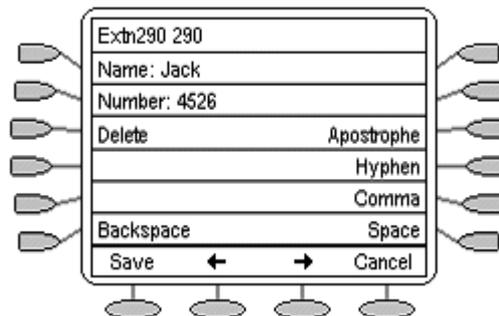

Note: Speed dials can be used for any numbers that can be manually dialed from the extension. If for external calls, a dialing prefix is required; that prefix must be part of the speed dial number.

Accessing the Speed Dial Directory/Dialing a Speed Dial

You can use the speed dial directory to make a call with the handset on hook or off hook.

1. Press ⬯ **SpDial** to display the speed dial directory.

   - If **SpDial** is not shown, you may have to press ☎**Phone Exit** to exit the current screen function.

2. The ↔ symbol is shown if there is more than one page of speed dials. You can move between pages using the ◄ **Page Left** and ► **Page Right** keys.

3. When the speed dial required is shown on the screen, press the ⬭ or ⬮ key adjacent to the speed dial name.

4. Continue as per a normal call.

Adding a Speed Dial from the Call Log

You can create a new speed dial from a call log entry. See To Turn a Log Entry into a Speed Dial . This process will start the normal speed entry screen but pre-filled with the name and number from the call log entry.

Editing a Speed Dial

1. Press ⬭ **SpDial** to display the speed dial directory.

   - If **SpDial** is not shown, you may have to press ☎**Phone Exit** to exit the current screen function.

2. The ↔ symbol is shown if there is more than one page of speed dials. You can move between pages using the ◀ **Page Left** and ▶ **Page Right** keys.

3. Go to the page containing the speed dial to edit.

4. Press ⬭ **Edit**.

5. Press the ▭ or ▭ key next to the speed dial to edit. The editing process is similar to adding a new speed dial, see Adding a New Speed Dial.

   - When editing an existing speed dial, a ▭ **Delete** option is provided to remove the speed dial from the speed dial directory. When selected press ⬭ **Delete** to confirm or ⬭ **Cancel** to exit without deleting.

Deleting a Speed Dial

1. Press ⬭ **SpDial** to display the speed dial directory.

   - If **SpDial** is not shown, you may have to press ☎**Phone Exit** to exit the current screen function.

2. The ↔ symbol is shown if there is more than one page of speed dials. You can move between pages using the ◀ **Page Left** and ▶ **Page Right** keys.

3. Press ⬭ **Delete**.

4. Press the ▭ or ▭ key next to the speed dial to delete.

5. Press ⬭ **Delete** to confirm the deletion. Press ⬭ **Cancel** to exit without deleting.

Adding a New Speed Dial

1. Press ⬭ **SpDial** to display the speed dial directory.

    *   If **SpDial** is not shown, you may have to press ☎**Phone Exit** to exit the current screen function.

2. Press ⬭ **Add**.

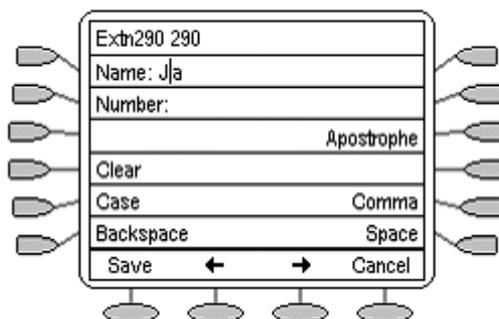

3. The cursor, a | symbol, in initially in the empty name field. You can move between Name and Number entry by pressing the adjacent 🗌 key.

4. Begin entering text using the telephone keypad. Each key is marked with the letters it provides. You may have to press the key more than once depending on the character you require.

    *   For example, the **2** key is also marked as **A**, **B** and **C**. To enter a **C** press the key until a C is displayed.

    *   If the next character you want to enter is on the same key, press ⬭ ➔ and then enter the next character.

5. As you enter characters you can use a number of other controls. Note: The controls on this screen are context sensitive, ie. they only appear when applicable. For example **Save** only appears when a name and number have been entered.

    *   ⬭ **Save** - Save the speed dial changes.
    *   ⬭ ← - Moves the cursor left one character.
    *   ⬭ ➔ - Moves the cursor right one character.
    *   ⬭ **Cancel** - Return back to the speed dial directory without making any changes.
    *   🗌 **Clear** - Delete the whole name or number entry.
    *   🗌 **Case** - Change the case of the current character between upper and lower case.
    *   🗌 **Backspace** - Delete the character before the cursor.
    *   ⬭ **Apostrophe** - Insert an apostrophe (') symbol.
    *   ⬭ **Comma** - Insert a comma (,) symbol.
    *   ⬭ **Space** - Insert a space.

Using the Call Log

Overview of the Call Log

The phone maintains a call log, accessed by selecting ⬭ **Log** on the display.

The call logs keeps logs of missed calls, outgoing calls made and incoming calls answered. Each of these logs includes the 30 most recent calls in each category. The details shown are:

- The name of the called or calling party if available.
- The number of the called or calling party.
- The time of the call.
- The date of the call if prior to the current day.
- The ↔ symbol indicates that the log contain more pages of entries. You can more between pages using the ◄ **Page Left** and ► **Page Right** keys.

Pressing the ⬭ or ⬭ key adjacent to a log entry displays full details of that log entry: Each individual log entry includes:

- The name of the called or calling party if available.
- The number of the called or calling party.
- The time of the call.
- The date of the call.
- The duration of the call for outgoing and answered calls.

Apart from using the call logs for information, you can turn a call log entry into a speed dial for future calls. You can also delete individual log entries or the all entries in a particular log.

Note: Call log entries are lost whenever the telephone system or the individual telephone are reset.

To Access the Call Logs

1. Press the ⬯ key under **Log**.

```
┌─────────────────────────────┐
│ Extn290 290                 │
├─────────────────────────────┤
│ Extn208            208 10:22│
│ INDeX416     70-736-4416 10:19│
│ JSmith       70-555-4400 10:08│
│ Extn200            200 10:07│
│ KSmith       70-555-4444 09:58│
│ Acme         80-555-4343 07:00│
│                        ↔      │
│ Missed  InAns  Outgo  DeleteAll│
└─────────────────────────────┘
```
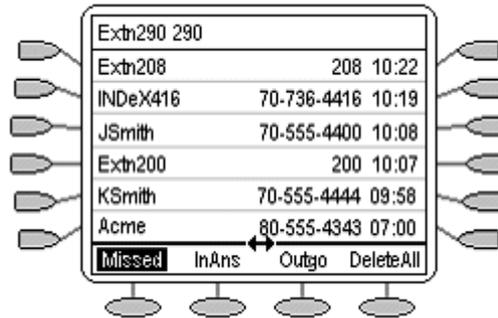

- If **Log** is not shown, you may have to press ☎ **Phone Exit** to exit the current screen function.

2. The call log always opens in the **Missed** calls log.

3. To select the log required press the ⬯ key under **Missed**, **InAns** or **Outgo**.

    - **Missed:** The log of missed calls, ie. those that rang your extension but were not answered. This includes calls that were diverted to voicemail or another number after ringing your extension.

    - **InAns:** The log of incoming calls that were answered. This includes both internal and external calls.

    - **Outgo:** The log of calls made. This includes both internal and external calls.

4. If the selected log contains more than one page of entries, the ↔ is shown. Use the ◀ **Page Left** and ▶ **Page Right** keys to move between pages.

To Display an Individual Log Entry

1. Locate the log entry in which you are interested.

2. Press the ▭ or ▭ key adjacent to the entry.

3. The log entry details are shown.

```
┌─────────────────────────────┐
│ Extn290 290                 │
├─────────────────────────────┤
│ Name: INDeX416              │
│ Number: 0-170-736-4416      │
│ Time/Date: 10:34  12/03     │
│ Type: Missed                │
│                             │
│                             │
│ Add to SD        Delete  Return│
└─────────────────────────────┘
```
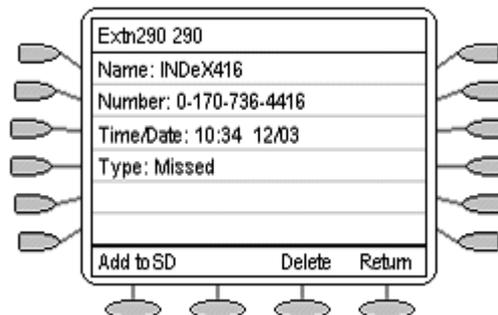

4. Using ⬯ **Return** key to return to the call log.

Making Calls from the Call Log

1. Locate the log entry in which you are interested from ⬭ **Missed**, ⬭ **InAns** or ⬭ **Outgo**.

2. Press the ⬭ or ⬭ key adjacent to the entry.

3. The log entry details are shown.

4. Press ⬭ **Call** make the call. If the number shown is external but doesn't include the external dialing prefix used by your telephone system, go off-hook, dial the prefix and then press ⬭ **Call**.

To Turn a Log Entry into a Speed Dial

1. Locate the log entry and press the ⬭ or ⬭ key adjacent to it.

2. Press ⬭ **Add to SD**.

3. The screen for editing and adding speed dials will appear, prefilled with the information from the log entry. Edit the details if required and press ⬭ **Save** or ⬭ **Cancel**.

4. You will be returned to the speed dials selection menu.

To Delete an Individual Log Entry

1. Locate the log entry and press the ⬭ or ⬭ key adjacent to it.

2. Press ⬭ **Delete**.

3. Press ⬭ **Delete** to delete the log entry. Press ⬭ **Cancel** to return to the call log without deleting the log entry.

4. You will be returned to the call log.

To Delete All Entries from a Log

1. Press ⬭ **Missed**, ⬭ **InAns** or ⬭ **Outgo** to select the log.

2. Press the ⬭ key under **DeleteAll**.

3. Select ⬭ **Delete** to delete the log entries. Press ⬭ **Cancel** to return to the call log without deleting the log entries.

To Exit the Call Logs

1. Press ☎ **Phone Exit**.

Disabling the Call Log

The phone's call logging can be switched off if required.

To disable call logging:

1. Press ✓ **Option** and select ⬭ **Application Options**. Press ▶.

2. Select ⬭ **Call Log**. It will toggle between **Enabled** and **Disabled**.

3. Select ⬭ **Save**. To restore the previous setting without changing it, press ⬭ **Cancel**.

Changing Options

Personal Ringing

The IP Office uses 'distinctive ringing' for different types of calls - a repeated single ring for internal calls, a repeated double ring for external calls and a single ring followed by two short rings for ringback calls. These options are fixed by the IP Office. The phone's own menus allow its ringer sound to be personalized so you can recognize it from other ringing phones.

To hear a ring pattern and change the Personal Ringing options:

1. Press ✓ **Option** and then select ▭▷ **Personal Ringing**. This alters the tone and style of ringing used by the phone, the ring pattern is still controlled by the IP Office according to the call type.

2. Select the corresponding ▭▷ button to the left or right of any numbered pattern. The **Current Pattern** number changes to the selected pattern, which rings once as a sample.

3. Repeat Step 1 until the preferred pattern appears as the **Current Pattern**.

4. Save the setting by pressing the ⬭ **Save**.

5. Upon saving or canceling, the first Options Main screen displays.

View IP Settings

Views of telephone and system information are available from this screen. A user normally does not need to view this information, however your System Administrator may ask you to report certain values from any of the status screens in the event of problems.

The status screen data can be viewed, but cannot be changed.

1. Press ✓ **Option**) and then select ▭▷ **View IP Settings.**

2. There are two pages of display. Use ◀ and ▶ select from:

    *   **IP Address Settings**
        IP (Internet Protocol) address information identifies certain components and connections. The IP Address information includes the location (address) of your phone on the IP Office unit, the location and port (connection) of the IP Office itself, the call routing and mask addresses, and the identification of the File Server with which your telephone interacts. Although technical in nature, having this information available and knowing how to get to it can assist your System Administrator in tracking questions about or problems with phone functions or connections.

    *   **Quality of Service (QoS) Information**
        QoS refers to a number of mechanisms used to improve audio quality over the network.

    *   **Phone Interface**
        Your phone interfaces with several system hardware devices and software. This screen provides information about three of the main interfaces.

    *   **Miscellaneous Information**
        The miscellaneous status screens provide additional information about your telephone and its connections.

3. To return to the first **View IP Settings** screen, press ⬭ **Return**.

Contrast Control

On first-time startup, the phone's display area contrast is set to a mid-level. Should you need to adjust it to better suit your work environment and lighting, 15 contrast levels are available.

NOTE: You may not be able to distinguish between all 15 contrast level settings. Some of the upper and/or some of the lower contrast level settings may appear identical to adjacent settings. This is normal.

To adjust the contrast level:

1. Press ✓ **Option**) and then select ▭ **Contrast Control**.

2. To adjust the contrast, use ◀ or ▶ until you reach the desired contrast level. (»» symbols provide visual confirmation of the current level.)

3. Save the contrast level you set by pressing the ▭ **Save**, or, to restore the previous setting without changing the contrast, press the ▭ **Cancel**.

Logging Off

Allows you to log your telephone off to prevent unauthorized use during an absence, or for privacy purposes

- **CAUTION:** Logging off deletes all call log entries and returns any options you may have changed to their default values.

To log your phone off:

1. Press ✓ **Options** and then select ▭ **Log Off**.

2. Select ▭ **Yes** to un-register your phone from the IP Office, delete all Call Log entries and returns any options you may have configured to their default values.

3. Selecting ▭ **No** returns you to the main Option menu; your phone remains logged on to the network and your Call Log and options values remain unchanged.

Reinstating the Phone

When your phone not registered on the phone system, the top line displays "Extension=*."

To reinstate your phone following a log off:

1. The telephone screen displays your extension number. Press the Hash (#) key. If the screen does not display your extension number, use the dialpad to enter the number, then press the Hash (#) key.

2. The display prompts for entry of your password. Using the dialpad, enter your PBX/switch Password then press the Hash (#) key.

3. The phone is now ready for use.

Feature Button Labeling

This feature can be used can be used to edit and change the text label shown next to buttons.

1. Press ✔ Options. Press ▶ and then ▭ **Feature Button Labeling**.

2. Select from:

   - Relabel feature buttons: proceed from next step:

   - View Default labels

   - Restore default labels: restores any previously renamed feature labels to their default state.

3. Select the function key whose label you wish to change. The display will change to show the editing menu with **New:** highlighted.

4. Begin by entering the new text using the telephone keypad. Each key is marked with the letters and number it provides. You may have to press the key more than once depending on the character you require.

   - For example, the key 3 is also marked as **D**, **E** and **F**. To enter an **D**, press **3**.

   - If the next character you want to enter is on the same key, press ➜ to move the cursor right and then enter the character. Alternatively, simply key the next character.

   - By default the first letter is entered in upper-case and the phone then switches to lower-case entry mode. To change the case of the current character press ▭ **Case**.

   - To enter a space press ▭ **Space**.

   - If you make a mistake, use the ▭ **Backspace** key to delete the character to the left of the cursor.

   - If you have make a mistake in the middle of the text, use the ⬅ key to backspace and then the ▭ **Backspace** key to delete the character to the left of the cursor.

   - To delete the complete entry use the ⬯ **Clear** key.

   - You can also enter an Apostrophe, Hyphen or Comma as required.

5. When the new name is set as required, press ⬯ **Save**.

6. To return to the Label screen without saving the changes press ⬯ **Cancel** and to return the main Options menu press ⬯ **Return**.

7. To return to the call handling screen without saving the changes press ☎ **Exit**.

Display Language Selection

Non-English speaking users can change the user interface language displayed on their phone.
Language options are:

- English, Français, Italiano, Japanese (Katakana characters), Español, Deutsche, Nederlands, Português.

Note: This does not alter your user language setting on the telephone system.

1. Press ✓ **Option**, ► and ▭ **Language.** A menu listing the available languages appears.

2. Press the ◄ or ► key next to the language required. You are asked in the original language "Are you sure?" with the same message in the new language below.

3. Do one of the following:

   - To return to the options menu without saving any changes, press ⬯ **Return**.

   - To save the settings and return to the options menu, press ⬯**Yes** (which is displayed in both the original and the selected language).

Phone Screen on Answer

This action controls the phone screen display when the phone is answered.

When the **Phone Screen on Answer?** option is set to **Yes**, the phone screen appears in the display area when you answer a call, regardless of the screen you were working with at that time. You will lose any unsaved work in progress on that screen (for example, labeling a Speed Dial button), except for the Web Access application (which "remembers" the current web screen).

When the **Phone Screen on Answer?** option is set to **No** (the default setting), answering an incoming call has no impact on the application screen displayed, although the top display line will provide an appropriate message.

To change Phone Screen on Answer:

4. Press ✓ **Option** and select ▭ **Application Options.**

5. Select ▭ **Phone Screen on Answer**. It will toggle between **Yes** and **No**.

6. Select ▭ **Save**. To restore the previous setting without changing it, press ▭ **Cancel**.

Phone Screen on Calling

This action controls the phone screen display when you make a call.

When the **Phone Screen on Calling?** option is set to **Yes** (the default setting), the phone screen appears in the display area when you make a call, regardless of the screen you were working with at that time. You will lose any unsaved work in progress on that screen (for example, labeling a Speed Dial button).

When the **Phone Screen on Calling?** option is set to **No** answering an incoming call has no impact on the application screen displayed, although the top display line will provide an appropriate message.

To change Phone Screen on Calling:

1. Press ✓ **Option** and select ▭ **Application Options.**

2. Select ▭ **Phone Screen on Calling**. It will toggle between **Yes** and **No**.

3. Select ▭ **Save**. To restore the previous setting without changing it, press ▭ **Cancel**.

Display Call Timers

This action controls whether the duration of the current call is displayed or not. If set to **Yes**, the duration of the current call is displayed on the call appearance key. If set to **No**, the call duration will not be displayed.

To change the Display Call Timers status:

1. Press ✓ **Option** and select ▭ **Application Options.**

2. Select ▭ **Display Call Timers**. It will toggle between **Yes** and **No**.

3. Select ▭ **Save**. To restore the previous setting without changing it, press ▭ **Cancel**.

Message Display Rate

When the IP Office sends messages to your phone that are longer than the display area, the first part of the message is presented for a specific time interval. The second part of the message is then displayed for a specific time interval. The Message Display Rate can be either **Fast** (display interval is 2 seconds) or **Slow** - default (display interval is 3 seconds).

To change Message Display Rate:

1. Press ✓ **Option** and select ▭▷ **Application Options**.

2. Select ▭▷ **Display Call Timers**. It will toggle between **Fast** and **Slow**.

3. Select ▭ **Save**. To restore the previous setting without changing it, press ▭ **Cancel**.

Call Appearance Width

When the Call Appearance Width is set to **Full** (the default), each line on which a call appears extends the full width of the display, and accommodates messages in the call appearance display area. When this option is set to **Half**, the call appearance area is limited to half of the display area and call-related messages appear on the top display line.

To change Call Appearance width:

1. Press ✓ **Option** and select ▭▷ **Application Options**.

2. Select ▭▷ **Call Appearance Width**. It will toggle between **Full** and **Half**.

3. Select ▭ **Save**. To restore the previous setting without changing it, press ▭ **Cancel**.

Visual Alerting

When this option is set to **No** (the default), ringing is the only notification of an incoming call. When set to **Yes**, your phone rings and your voice message indicator light flashes to alert you to an incoming call.

To change Visual Alerting:

4. Press ✓ **Option** and select ▭▷ **Application Options**. Press ▶.

5. Select ▭▷ **Visual Alerting**. It will toggle between **Yes** and **No**.

6. Select ▭ **Save**. To restore the previous setting without changing it, press ▭ **Cancel**.

Function Keys

Overview of the Function Keys

Both ⬭, ⬭ Function Keys and ⬭ Soft Keys can be used to access a range of system features. The display adjacent to the key shows the feature name.

Some of these features are default features, for example **SpDial**, **Log** and **Option** which are always available. Others are system features that **can only be programmed by the System Administrator** for Function Keys. See Function Key Programming.

In addition, there are a number of System Features that you **can always access yourself** by the use of short codes. Refer to System Features Introduction for details of System Features that you can always access yourself by dialing short codes, e.g. ***17** to listen to your voicemail messages.

The main screen has four pages. This means that the eight ⬭ and ⬭ Function Keys on each page could be used for up to 24 features. However, it is **strongly recommended** that all three Call Appearance keys **remain at their default settings**. Hence, there are 21 soft Function Keys that can be allocated to system features.

To move between pages use the ◀ and ▶ keys.

In the following example:

- The first three keys have been set as call appearance lines.

- Keys 4 and 5 have been set to access the **Admin** and **Admin1** programmable functions.

- Key 6 has been set to monitor system park slot 1. The ◆ indicates a call is currently parked in slot 1.

- Key 7 has been set to the SAC (Send All Calls) function.

- Key 8 has been set to VMOn, a function which toggle use of the user's voicemail mailbox on/off. The ◀ indicates that this function is currently on.

- Pressing either ◀ or ▶ would display the other two pages of programmed functions set for this phone.
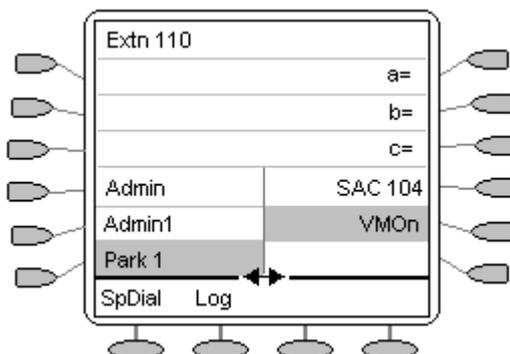

Programming Your Own Features:

If the phone has been setup with either or both the Admin and Admin1 features assigned to display keys, you can select and program your own feature choices against other keys. See Function Key Programming.

Function Key Programming

If any one of the keys on the telephone is programmed with an **Admin** or **Admin 1** feature, it allows you to program further features against other function keys. Both **Admin** and **Admin1** are allocated to your function keys by your System Administrator and would appear on a menu screen that is similar to the following:

```
Extn 110
                                    a=
                                    b=
                                    c=
Admin              SAC 104
Admin1             VMOn
Park 1
SpDial    Log
```
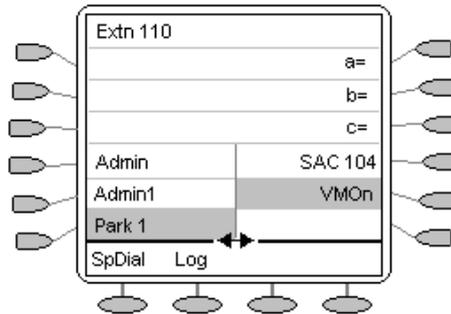

The two tables below list the user programmable features available from **Admin** and **Admin1**. For full details of how each function works see System Features.

Admin: The programmable functions available via an **Admin** key are:

Name	Description	Toggles	Data
Acct	Account Code Entry	No	Optional
AD	Abbreviated Dial	No	Yes
Admin	Self-Administer	No	No
AutCB	Automatic Callback	Yes	No
CFrwd	Call Forwarding All	Yes	Optional
CPark	Call Park	Yes	Optional
CPkUp	Call Pickup	No	No
Dir	Directory	No	No
DPkUp	Directed Call Pickup	No	Yes
Drop	Drop	No	No
GrpPg	Group Paging	No	Yes
HdSet	Headset Toggle	Yes	No
HfAns	Internal Auto-Answer	Yes	No
HGNS+	Set Hunt Group Night Service	No	Yes
Park	Call Park to Other Extension	No	Yes
Prog	Abbreviate Dial Program	No	Yes
RngOf	Ringer Off	Yes	No
SAC	Send All Calls	Yes	No
Spres	AD Suppress	Yes	No
Timer	Timer	Yes	No
TmDay	Time of Day	Yes	No

In addition to the above, there is a key labeled **Exlp?** This key enables you to change the display from the shorthand version displayed at default to a longhand version of your own. See Shorthand Programming Mode and Longhand Programming respectively.

Admin1: The programmable functions available via an **Admin1** key.

Name	Description	Toggles	Data
Park	Park	No	Yes
User	User	No	Yes
Group	Group	No	Yes
Number	Dial	No	Yes
Flash	Hook Flash	No	No

Shorthand Programming Mode

1. Press ▭ **Admin** or ▭ **Admin 1**. See Display Key Programming.

2. The **Admin** or **Admin1** menu appears as follows:

    Admin Pages
    With the exception of **Expl?**, the names shown are the features that you can assign to soft keys. When **Admin** has been selected you can display the full name of the feature by pressing **Expl?**. See Longhand Programming.

    Admin1 Page
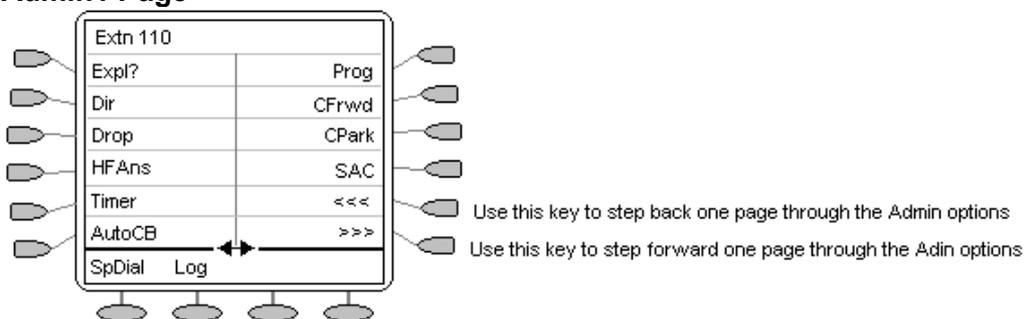

3. On the **Admin** pages, use the ◄ and ► keys to move through the list of feature.

4. When the function required is shown, press the ▭key adjacent to its name.

5. If the function requires some data to be entered, **[** is shown at the bottom of the display.
   Enter the data using the normal telephone keypad.

6. The upper part of the display reverts to showing the functions currently assigned to each ▭ and ▭key.

7. Select the display key against which to program the new function by pressing that ▭ or ▭key.

    - **Caution:** Do not select the slot used for the **Admin** function.
      Replacing this function will lock the phone for further programming until reset through the telephone system.

8. If the display slot is not already used, the display shows **BUTTON PROGRAMMED!**.

    - Press ☎**EXIT** to end programming.

    - Press ▭ **Cont** to continue programming other functions.

9. If the display slot already has a programmed function, the display shows **FEATURE ON BUTTON**. Press the ◄ or ► keys until **Repla**, **Keep** and **Delet** are shown along the right-hand edge of the display.

    - Press **Repla** ▭to replace that existing function with the one just programmed.
      The display then shows **BUTTON PROGRAMMED!** as above.

    - Press **Keep** ▭to keep the existing function and forget the function just programmed.

    - Press **Delete** ▭to delete the existing function and forget the function just programmed.

Longhand Programming Mode

1. Press ⬜▷ **Admin** or ◁⬜ **Admin 1**. See Display Key Programming. .

2. Pressing **Expl?** ◁⬜to switch to longhand programming mode.

3. Press **Next** ◁⬜until the required function required is shown, then press **Selct** ◁⬜.

4. If the function requires some data to be entered, **[** is shown at the bottom of the display. Enter the data using the normal telephone keypad.

5. The upper part of the display reverts to showing the functions currently assigned to each ⬜▷ and ◁⬜key.

6. Use the ◀ and ▶ keys to move between the pages of display keys.

7. Select the display key against which to program the new function by pressing that ⬜▷ or ◁⬜key.

   - **Caution:** Do not select the slot used for the **Admin** function. Replacing this function will lock the phone for further programming until reset through the telephone system.

8. If the display slot is not already used, the display shows **BUTTON PROGRAMMED!**.

   - Press ☎**EXIT** to end programming.

   - Press ⬜▷ **Cont** to continue programming other functions.

9. If the display slot already has a programmed function, the display shows **FEATURE ON BUTTON**. Press the ◀ and ▶ keys until **Repla**, **Keep** and **Delet** are shown along the right-hand edge of the display.

   - Press **Repla** ◁⬜to replace that existing function with the one just programmed. The display then shows **BUTTON PROGRAMMED!** as above.

   - Press **Keep** ◁⬜to keep the existing function and forget the function just programmed.

   - Press **Delete** ◁⬜to delete the existing function and forget the function just programmed.

System Features

Introduction

As well as your phones specific features, you can access a number of system features by dialing short codes.

These instructions are for the system's default configuration. They assume that you are using the default feature codes. It also assumes that you have full access to all features and the public telephone network.

Making Calls

Internal Calls:

If your System Administrator has allocated you the *Ring Back When Free* feature (see RBak+ - Ringback When Free) under a dial pad digit, you can:

1. When you call an extension that does not answer or is busy, press the ⬅ **RBak** feature key to set a callback on that extension.

2. When the extension you called becomes free, your phone will ring (a burst of three rings).

3. Lift the handset and the extension is called automatically.

4. When the extension you called is free, your phone will ring (a burst of three rings).

5. Lift the handset and the extension is called automatically.

External calls:

To make an external call, either dial the number (prefixed by the access code if required) or use a speed dial code (contact your system manager for a list of your speed codes).

If you hear busy tone while dialing, then the call may be barred. Your system manager can bar certain calls, such as those to premium rate numbers and international calls

Answering Calls

Ringing at your own extension:

Simply pick up the handset. When in headset mode, press the button associated with the alerting call.

The default ringing cadences are:

- Internal calls have a single ring cadence

- External calls have a double ring cadence.

Ringing at another extension:

You can answer from your own phone by using Call Pick-Up; lift your handset and dial:

- ***30** to answer a call ringing anywhere.

- ***31** to answer a call within your group.

- ***32*201#** to answer the call for a particular extension, in this example 201.

Note: If your phone rings for any longer than a specified period (15 seconds in default), any re-direction feature that you have activated, such as voicemail or call forwarding, will come into effect.

Call Waiting

Call Waiting tells you if another call arrives while you are already making a call by providing call waiting tone. If you hear the call waiting tone, either end your current call or put the caller on hold. The waiting call should then ring.

To turn call waiting on use the code ***15**; to turn it off use ***16**.

Call Forwarding

Your calls can be forwarded to another extension or an external number either when you are away from your desk (on no answer), when your extension is busy (on all Call Appearance keys), and all calls (for example when you go on holiday).

- To set the number to which your calls are forwarded dial ***07*201#** (forwarding to 201 in this example).
- To switch forward direct station calls (i.e. not Hunt Group) on, dial ***01**. To switch it off dial ***02**.
- To switch forward on busy on dial ***03**, to switch it off dial ***04**.
- To switch forward on no answer on dial ***05**, to switch it off dial ***06**.

Diverting Calls

You can divert your calls to another extension.

Note: If you do not answer calls at the temporary extension, they are forwarded to your own voicemail or call forwarding number.

At another extension:

- ***12*N#** from the extension you are temporarily using (where **N** is your extension number). Hence, calls to your extension will be diverted to the extension you are temporarily using.
- ***13*N#** to re-direct the calls back to your own extension, before you return to it.

At your own extension:

- ***14*N#** from your own extension (where **N** is the extension to which you want your calls diverted).
- ***14*#** to cancel either feature from your own extension.

You can divert your calls to another extension. In the examples below *N* is the extension to which you want your calls diverted.

Note: If you do not answer calls at the temporary extension, they are forwarded to your own voicemail or call forwarding number.

At another extension:

- ***12*N#** from the extension you are temporarily using.
- ***13*N#** to re-direct the calls back to your own extension, before you return to it.

At your own extension:

- ***14*N#** from your own extension.
- ***14*#** to cancel either feature from your own extension.

Do Not Disturb

You may choose to receive no calls at all or only those from particular callers on your exceptions list:

To switch Do Not Disturb on/off (with or without exceptions):

- Dial ***08** and to switch it off dial ***09**

  or

  > Dial ***10*N#** to add a number to the exception list.

  or

- Dial ***11*N#** to delete a number from the exception list.

Note: Your callers, other than your exceptions, either hear busy tone or are re-directed to your voicemail.

Voicemail

Note that not all systems support voicemail or have voicemail installed.

- To switch voicemail on dial ***18**, to switch it off dial ***19**.
- To retrieve your voicemail, use the code ***17**.

Your voicemail may be set up to deliver your messages by calling you whenever you hang up: this feature is known as *Voicemail Ringback*.

- To turn Voicemail Ringback on dial ***48**; to turn it off dial ***49**.

Dialing a number while listening to your messages invokes further facilities:

Once messages have been delivered, they are held on the system for 24 hours (this is fixed for Voicemail Lite, but can be varied by your System Administrator if your IP Office is equipped with VoicemailPro).

You can collect your voicemail from another extension by using the PIN your System Administrator has set up for you. You can collect your messages if you are out of the office, by either dialing from a number that has been registered for the purpose or by dialing your extension number and PIN when prompted. If validation is successful, then dial **1** to retrieve your mail.

The System Administrator also specifies the reception number, to which the call is diverted if the caller dials **0**, and your email address if your voicemail and email are integrated.

Default Feature Codes

The following are the normal default feature codes available to all users. Your System Administrator may add additional codes for other features and for speed dials.

The **N** where shown, should be replaced by the appropriate number. For example, with ***07*N#**, replace **N** with the extension to which you want your calls forwarded when you have forwarding switched on.

*00	Cancel All Forwarding	*32*N#	Call Pick Up Extension
*01	Forward Unconditionally On	*33*N#	Call Queue
*02	Forward Unconditionally Off	*34	Hold Music
*03	Forward on Busy On	*35*N#	Extn Login
*04	Forward on Busy Off	*36*N#	Extn Logout
*05	Forward on No Answer On	*37*N#	Park Call
*06	Forward on No Answer Off	*38*N#	Ride Call
*07*N#	Forward to number	*39	Relay On
*08	Do Not Disturb On	*40	Relay Off
*09	Do Not Disturb Off	*41	Relay Pulse
*10*N#	Do Not Disturb Exception Add	*42	Relay On
*11*N#	Do Not Disturb Exception Delete	*43	Relay Off
*12*N#	Follow Me Here	*44	Relay Pulse
*13*N#	Follow Me Here Cancel	*45*N#	Call Steal
*14*N#	Follow Me To	*46	Call Steal
*15	Call Waiting On	*47	Conference Add
*16	Call Waiting Off	*48	Voicemail Ringback On
*17	Voicemail Collect	*49	Voicemail Ringback Off
*18	Voicemail On	*50	Forward Hunt Group Calls On
*19	Voicemail Off	*51	Forward Hunt Group Calls Off
*20*N#	Set Hunt Group Night Service	*52	Clear Call
*21*N#	Clear Hunt Group Night Service	*53*N#	Call Pickup Members
*29	Toggle Calls	*57*N#	Forward on busy number
*30	Call Pick Up Any	*70*N#	Dial Physical Extn by Number
*31	Call Pick Up Group	*71*N#	Dial Physical Extn by ID

Web Browsing

Overview of Web Browsing

The phone can act as a web browser for WAP (Wireless Application Protocol) web sites. These web sites contain pages written in a language called WML (Wireless Markup Language). The phone supports WML1.2.

If your telephone system has been setup with a default WAP website, the phone will display 💬 **Web**. Pressing this key will display your systems default WAP website. The links and services on this site will control the WAP website and services you can access.

```
Extn290 290
┌──────────────────────────┐
        Welcome to XYZ Hotel     ▲
 Menu                            ↑
 Attention:Special discount rates ⌂
 at Atlantic City casinos. See    ↻
 Tourist Info                    ↓
 for more information            ▼
├──────────────────────────┤
   Help     Lobby    Home
└──────────────────────────┘
```

While browsing, you can still make and receive calls. But if you have **Phone Screen on Answer** option set to **Yes** and you answer an incoming call, the default phone screen will replace the existing web page in the display area.

To enter web browsing mode:

1. Press the 💬 key under **Web**.

To exit web browsing mode:

1. Press ☎ **Phone Exit**.
2. If ☎ **Phone Exit** is pressed while browsing the web, the last web page viewed will be displayed when 💬 **Web** is pressed again before a system reboot.

Accessing External WAP Websites

Your default WAP web site may contain a page where you can select or enter the URL of external WAP websites. If this is the case, you should be aware that some website may contain information that the phone is not able to display.

If the WAP web page uses WML features that the phone does not support, those features will not be shown.

If the WAP web page uses features that the phone does not recognize as valid WML 1.2, the phone will display **Not a valid WML page**.

Web Navigation Controls

Having pressed display ⬭ **Web** to access your default WAP website, the phone display shows a number of navigation controls.

- **Navigation Icon Buttons:**
  These appear on the right-hand side of the web display. Note that they may appear grayed out when not useable.

    - **⬆Up Page:**
      Press the adjacent ⬭ key to move up the page by one screen (six lines).

    - **↑Up Line:**
      Press the adjacent ⬭ key to move up the page by one line.

    - **⌂Home:**
      Press the adjacent ⬭ key to return to the default WAP website's home page.

    - **↻Refresh:**
      Press the adjacent ⬭ key to reload the current page. If you had already selected another page to load this will cancel the loading of that page and reload the current page.

    - **↓Down Line:**
      Press the adjacent ⬭ key to move down the page by one line.

    - **⬇Down Page:**
      Press the adjacent ⬭ key to move down the page by one screen (six lines).

- **Link Buttons:**
  The ⬭ keys at the left hand edge of the screen are used to select links within the displayed web page. Links are indicated by underlined text. Only one link will appear on a line and pressing the adjacent ⬭ key will activate that link.

- **Page Buttons:**
  The ⬭ keys across the base of the web display may be used to provide labeled links to other pages. If there are more than 3 such links, the right-hand ⬭ key will be labeled as **More**, press this key to display the additional options.

- **☎Phone Icon:**
  If the ☎ icon appears next to a link in the web page, it indicates that the link is a telephone number. Pressing the adjacent ⬭ key to select the link will dial the number.

Entering Data

Some web pages may require you to enter data into a text field and then submit that data. For example, if you browse to a search engine web site like Google, you may be asked to enter a search field.

- ▫**: Option (Radio Buttons)**
  These allow you to select an option from a list by clicking on the adjacent left-hand ▭ key. The selected option appears as ◉.

- **[] : Text Entry Fields**
  These normally appear as **[Enter text here]** or pre-filled with some data.

- **Submit Buttons**
  Text entry and option key selections are not completed until submitted. Normally this will be done by a link, using a ▭ or ⬯ key, labeled as **Submit** or similar. The exact appearance will vary between different web pages.

<u>**To enter text into a [ ] text entry field**</u>**:**

1. Press the left-hand ▭ key adjacent to the **[ ]** text entry field.

2. The four ⬯ keys at the bottom of the screen change to:

   - **DONE:** Press this ⬯ key when your text entry is complete.

   - **BKSP:** Press this ⬯ to key delete the previous character.

   - **SPACE:** Press this ⬯ key to add a space.

   - **alpha:** This indicates the current text entry mode (in this example lower-case letters). Press the ⬯ key to select a different text entry mode.

3. Begin entering text using the telephone keypad. Each key is marked with the letters it provides. You may have to press the key more than once depending on the character you require.

   - For example, the **2** key is also marked as **A**, **B** and **C**. To enter a **C** press the key three times.

   - If the next character you want to enter is on the same key, press **1** and then enter the next character.

4. The right-most ⬯ key indicates the current text entry mode. To change the current mode, press the right-hand key. The available modes are shown along the bottom of the screen. They are:

   - **ALPHA:** Enter upper-case letters using the telephone keypad.

   - **alpha:** Enter lower-case letters using the telephone keypad.

   - **Num:** Enter numbers using the telephone keypad.

   - **Symbol:** Enter a symbol from the displayed menu. Possible symbols are: . , # @ * ' " ; : \ / – | $ % ! ? & + = > < ( ) ~ _ ^ [ ] { }. These are arranged in pages and you may have to press **MORE** ⬯to select the required page. To enter a symbol, press the ▭ key next to it.

5. When you have completed your text entry, press ⬯ **DONE** .

6. You can return to text entry by pressing the left-hand ▭ key adjacent to the **[ ]** text entry field again.

Management and Troubleshooting

Overview

This chapter provides helpful information for:

- Testing your telephone to be sure it is operating correctly.

- Basic Troubleshooting; this chart provides the most common problems an end user might encounter and suggested resolutions.

- Application-specific troubleshooting; this chart describes problems and solutions specific to phone applications; Speed Dial, Call Log, or Web Access.

- Resetting or power-cycling your phone, when Basic Troubleshooting does not resolve a problem.

Testing the Telephone's Lights and Display

1. With the telephone idle (on-hook), press and release the 🔇 **Mute** button, then press the following numbers on the dialpad: 8 3 7 8 # (which stands for TEST).

   - The display should indicate the self-test has started. If the test is successful, the message "Self test Passed #=end" displays; if the test is not successful, the message "Self test Failed #=end" displays instead.

2. Press # to return to the Phone screen.

   - If nothing appears on the display and the phone is receiving power, your phone may need to be replaced. Contact your System Administrator for assistance or additional troubleshooting information.

Troubleshooting

- **Phone does not activate when connected for the first time:**
  Unless your System Administrator has already initialized your telephone, you may experience a delay of several minutes before it becomes operational. Upon plug-in, your telephone immediately begins downloading its operational software, its IP address, and any special features programmed by your System Administrator from the server to which it is connected. Report any delay of more than 10 minutes to your System Administrator.

- **Phone does not activate after a power interruption:**
  Allow a few minutes for re-initialization after unplugging, powering down the phone, server problems, or other power interruption causes.

- **Display shows an error/informational message:**
  Most messages involve server/phone interaction. If you cannot resolve the problem based on the message received, contact your System Administrator for resolution.

- **Speakerphone does not operate:**
  Ask your System Administrator if your Speakerphone has been disabled.

- **Characters do not appear on the display screen:**

  - See "Phone does not activate when connected for the first time" above.

  - Check all lines into the phone to be sure it is properly connected.

  - Check the power source to be sure your telephone is receiving power.

  - Perform the following Test procedure: with the telephone idle (on-hook), press and release the ✗ **Mute** button, then press the following numbers on the dialpad: **8 3 7 8 #** (which stands for TEST). The display should indicate the self-test has started, then report if the test was successful or failed. If nothing appears on the display, and the phone is receiving power, your phone may need to be replaced.

  - If the above suggested solutions do not resolve the problem, reset or power cycle the phone with your System Administrator's assistance.

- **No dial tone:**
  Make sure both the handset and line cords into the phone are securely connected. Note that there may be a slight operational delay if you unplug and reconnect the phone. Contact your System Administrator if the problem persists.

- **Phone does not ring:**
  Set your ringer volume to a higher level using the ▲ and ▼ **Up/Down Volume** keys. From another phone, place a call to your extension to test the above suggested solution.

- **All other IP problems:**
  Contact your System Administrator.

SPEED DIAL APPLICATION:

- **You cannot dial out using any Speed Dial entries:**
  Dial button. Check that all call appearances (incoming/outgoing lines) are not already in use. If all lines are in use, wait until a line is available to make your call.

- **You cannot add an entry to the Speed Dial list:**
  You have 108 Speed Dial entries, the maximum allowed. You must delete at least one entry before adding a new entry.

CALL LOG APPLICATION:

- **You cannot dial out after selecting a call log entry:**
  Check that all call appearances incoming/outgoing lines) are not already in use. If all lines are in use, wait until a line is available to make your call.

- **You cannot add an entry to the Speed Dial list:**
  You have 108 Speed Dial entries, the maximum allowed. You must delete at least one entry before adding a new entry.

- **Dialing from this application does not go through:**
  Your administrator must administer settings for the Enhanced Dialing feature beyond the defaults.
